WELCOME REMARKS

Welcome to the 4th Tissue Procurement and Processing Course!

We are pleased to have you join us for this two-day event which is dedicated to advancing the knowledge and practical skill in tissue donation, procurement and processing, particularly in human bone, cornea, and skin for the purpose of transplant. As the demand for high-quality human tissue allografts continues to grow, the importance of safety, ethics, and standardized procedures has never been more critical.

This course is designed to provide participants with a strong foundation of principle and practical skill needed in tissue procurement. Through expert-led sessions, hands-on demonstrations, and interactive discussions, we aim to enhance the competency of healthcare professionals involved in every step of the tissue procurement and processing.

Whether you are new to this field or intend to deepen your expertise, we hope this course will inspire continued commitment to uphold the highest standards in tissue banking that lead to improving patient healthcare.

On behalf of the Malaysian Association of Cell and Tissue Banking (MACTB), we thank you for being part of this important event.

See you in Penang!

Warm regards,

Dr Chandramalar T Santhirathelagan
Course Chairman
